The Role of Partnerships

Info on why partnerships are important

Here we will supply a series of logos for 'main partners' i.e. Govt Departments etc. These logos will be static and link to the relevant partner website

Here we will supply a series of scrolling logos for 'other partners' – the logos will link to the relevant partner websites

'other' info that normally appears across the bottom of a website

Turquoise shaded blocks indicate menu items that will link directly to a page/informaton on the website

Orange shaded items will offer a drop-down menu that will then link to other pages on the website – the number provided in the block indicates how many items will appear on the drop-down menu and therefore guides the number of 'pages' to be created (refer website content doc for an idea of what will go onto these pages)
